Battle of Camp Wildcat

-  Hazel Patch Rd, Kentucky 40729, USA
-  Point of Interest, Cemetery, Landmark, Tourist Attraction, Arts & Culture

Though the armies have long since disappeared, many of their trenches remain as reminders of what happened on that October day. If you visit the battlefield and stand quietly behind the trenches you may feel your heart begin to pound just like the soldiers' hearts pounded in 1861.

The battlefield looks much different from the etchings made in 1861. Most of it has been logged-over several times. A few trails lead to the faint outlines of old trenches that remain.

The remoteness of location of this battle makes it unique, because you can still see these trenches. Battlefield sites located in gentler terrain were farmed over and developed, destroying signs of the battle.
